

SL Series

Session 2: SL Hot Spots

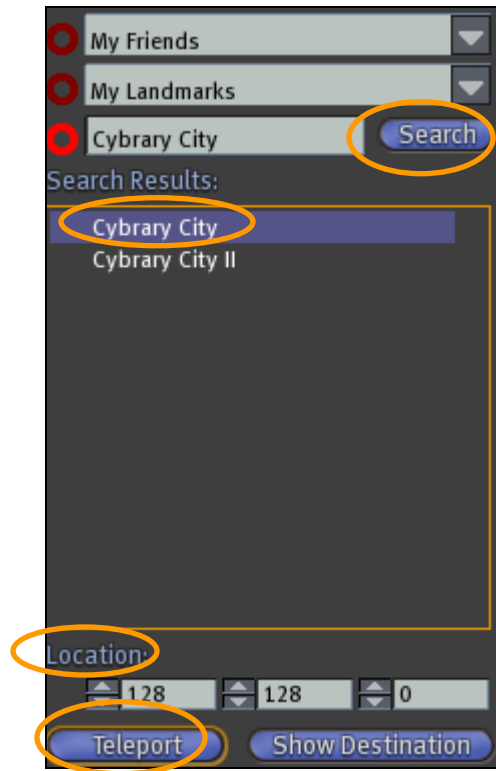

Wednesday, February 27, 2008
1-1:30pm, LW 211
Laura Jordan

Teleporting

The first step in traveling to the hot spots in SL is teleporting. First, bring up the SL map by clicking on the “**MAP**” tab at the bottom of your screen.

Next, type in the name of your location in the search box and click “**SEARCH.**” Then select the appropriate location and click “**TELEPORT.**”

If you have permission to teleport to that location (i.e. it is a location open to the public), then you will be teleported to the infohub of that location.

If you want to teleport to a specific set of coordinates within your location (which differ from the infohub), you must still type in the correct title of the location island, and then you may add the coordinates under the “**LOCATION**” label.

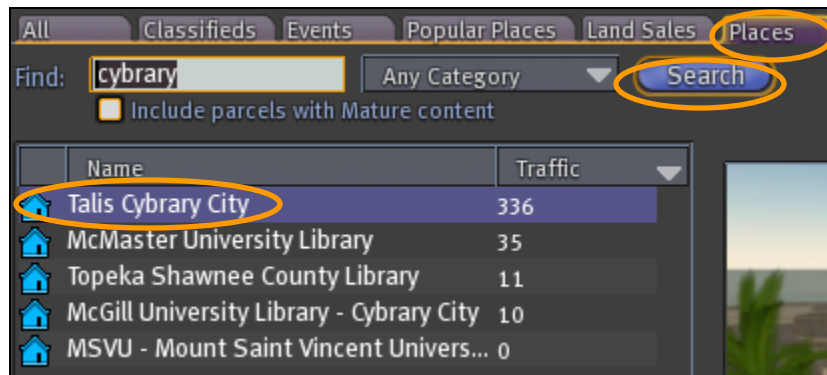

Searching

You can also teleport to a location via the search menu. You may choose to use the search menu if you do not know the exact name of the location to which you would like to teleport or if you are having difficulty finding that location via the map tab.

You may get to the search menu by clicking on the “**SEARCH**” tab on the bottom of your screen.

In this menu, you can choose to search throughout all of SL or limit your search to classifieds, events, popular places, land sales, or places. To limit your search to places, click on the “**PLACES**” tab on the top of your screen and then type in your keywords in the search box. Then click “**SEARCH**”.

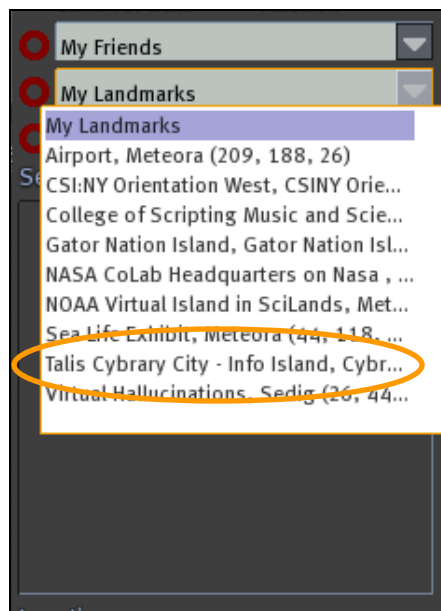

As with the map menu, you may now select the appropriate location from the results. The results in this menu are organized by the level of visitors they have trafficking the location. To teleport to the location, double click on its name.

Creating Landmarks

If you like a location (and don't want to have to search for it again), you may add it as a landmark, and it will be added as a quick link in your map menu. To add a landmark, once you are at the location you wish to landmark, click on **"WORLD"** at the top of your screen and select **"CREATE LANDMARK HERE."**

Your new landmark will now appear in your map menu. To return to your map menu, click on the **"MAP"** tab at the bottom of your screen. Next click on **"MY LANDMARKS,"** and a complete list of your landmarks will appear.

Select your landmark and then click **"TELEPORT."**

Locations We Will Visit Today

- College of Scripting Music and Science
 - Island: Horsa
 - Coordinates: 45 x 243 x 85
- National Oceanic and Atmospheric Association (NOAA)
 - Island: Meteora
 - Coordinates: 177 x 161 x 27
- CSI Orientation
 - Island: CSINY Orientation West1
 - Coordinates: 84 x 153 x 24
- Virtual Hallucinations
 - Island: Sedig
 - Coordinates: 26 x 45 x 22

Homework

- Find some cool spots of your own and share them with me laujord@uflib.ufl.edu.
- Spend some time in the SL training site at the College of Scripting & Music.
- Create a few landmarks of your own.
- Practice searching for locations of interest to you.

****Next session: "Tips & Tricks in SL," on Wednesday, April 2, 1-1:30 in Library West Room 211.****
