Minutes
September 8, 2010
Library West 429

Present: Alena Aissing, Joe Aufmuth, Denise Bennett, Diane, Bruxvoort, Michele Crump, Robena Cornwell, Rebecca Jefferson, Cathy Martyniak, Ann Lindell, Rachel Schipper, Laurie Taylor, Carl Van Ness, Pricilla Williams, Cecilia Botero, Patrick Reakes, Marilyn Ochoa, Isabel Silver, Chris Poehlmann

Not present: Sam Huang, Christopher Vallandingham, Ben Walker, Ryan Litsey, Jan Swanbeck, Peter McKay, Judy Russell

I   Minutes Approval

August minutes have been approved.

II   DLC Update & Projections Feedback for Discussion/Approval – Laurie Taylor
Current Capacity Report - http://digital.uflib.ufl.edu/organization/goals/

Data Space Pricing Model by Princeton – Princeton is taking their current standard storage costs and doubling it and they think this will cover costs in perpetuity. Laurie is not sure the storage prices will drop that quickly, but it could be a model we could look into using on grants (as opposed only to annual costs) to cover more of the storage costs.

Question: Is there a place for the money to be stored?
Answer: Laurie does not know at this time. There is a CNS meeting tomorrow and she will find out more.

Question: Patron request is in two categories, what is the general patron support?
Answer: It is questions and pulling files. We have some standardized questions.

Simplified URLs are in alpha right now, but hopefully will be in beta soon. There will be more changes when in beta.

Rachel suggested for Laurie to send an email to the committee with her questions for feedback regarding the DLC updates and projections.

Cathy informed the committee that Judy approved preliminary allocations of the Internet Archive funds. In March 2009 signed $200,000 contract with internet archives.

Spent $50,000 so far mostly on dissertation scanning project. Need $30,000 more and will be doing all the easy permission slips. Waiting for permission slips before starting anything. ILL requests for dissertations are sent to DLC for quick responses.

Duplicate and Triplicate Projects at the Storage Facility – New storage will only have one copy of any additional monogram journals. Judy wants copies not going into a tray to be considered for scanning. There are estimated 17,000 titles with two or more copies in ALF out of copyright. We do not have enough money for all the pages to be copies.

- Phase I – 1,400 of those from across different parts of ALF will be copied. The rest will be put to the side for a later date.

Cathy and Chelsea Dinsmore are working on a project with items that have 2, 3, 4 and 6 pages that are hard to put in trays. They are scanning them since they are so small. There is about 15,000 – 16,000 titles.

Money for scanning projects has been set aside for Judaica and Government Documents.

Question: Will the internet archive money be replenished when it is gone?
Answer: Judy informed Cathy it will likely be replenished at some point.

Pricilla was approached by a psychologist who was excited about the dissertation project.

III   E-resources - Christian

E-resources
Finally have a Wiley-Blackwell license. Twenty titles are no longer sharable, but have subscribed to half of them. The other half he has requested a price quote. Might have to subscribe to them individually which might run about $5,000 - $6,000, but will not know for sure until all price quotes come in.

Claire is in the preliminary stage of negotiating a social contract for Sage.
- Option 1 – All access package which includes everything plus new titles. The cost will be a 6% increase a year for three years. Estimated spend is $254,230 for 2011.

- Option 2 – Purchase everything now, but no access to new titles. Would have to pick them up individually. The cost will be a 4%, 3% then a 3% increase for the next three years.

Getting more information and will get back to the committee about it. He will also send out the title list.

FCLA
Trial BX Recommender – Like Amazon, but done with articles instead of books. It is based on the SFX clause and they now have an API serial solution. FCLA will fund it and the cost will be about $2,300 - $2,500 for each library. Diane was at the CSUL meeting last week and did not get a lot of positive feedback for FCLA regarding the BX Recommender. The Deans want more content.

ERS Face to Face
Discovery Services – EBSCO and Serial Solutions demonstrations. FCLA is working on doing a beta of Primo Central and next week someone from Innovative Interfaces will be coming to campus to demonstrate their discovery service.

Question: If FCLA does it, then who is the content based on?
Answer: Diane said CSUL talked about this at the last meeting. There is a trial going on with it now, but there are a lot of problems with it.

Proquest – Joe mentioned the NTIS price had doubled. The sales representative did not know what happened. It is being researched.

IV   Government documents – Joe Aufmuth

See V - VIII

V   UF Celebrates Constitution Day Sept. 17 – Joe Aufmuth

UF will be celebrating U.S. Constitution Day. There will be a reading of the constitution on Friday, Sept. 17, 2010 from Noon – 1:30 p.m. The location will be under the canopy on the Plaza of the Americas outside of Library West.

On the same day, the College of Law will have a Social Media and the Constitution Panel Discussion from 10:00am – 11:30am in the College of Law room 180.

VI   GIS Day Nov. 17 - Joe Aufmuth

The committee met last week. Consists of members from the School of Forestry, Santa Fe College, Documents Department, Cataloging and more. They are working on developing a theme, speakers and increasing activities like geo cashing.

VII   Current Topics Web Page – Joe Aufmuth

The web page has current topics like Hurricane Season, War in Afghanistan and the Pakistan Flooding.

VIII   UF Oil Spill Task Force – Joe Aufmuth

The task force is composed of different leaders from the University of Florida and the surrounding areas. The library has a group participation in it. Vernon and Judy are the liaisons. Tom Fraser was informed that we are offering our assistance to the task force. Mathew Daily is involved in developing an oil spill task force web page. Sara Russell Gonzalez is looking at VIVO and helping with the oil spill. Regarding the data base, Donna has already developed an oil spill lib guide and will be working with the science selectors on populating data. Laurie Taylor is working on the DLC collection. Laurie is waiting for more information to put into the DLC collection. Joe will work on any GI assistance the task force may need. Will Chaney is offering IT support. Judy asked for costs for the type of assistance we would provide.

IX   Additional Agenda Topics:

<u>CSUL Update</u> – ALF will be used for the U-borrow program. Task force was put together to see how ILIA can be used better. FCLA is moving forward with Aleph for U-Borrow.
Cecilia is working on two proposals:
- The board of governors has a onetime funding and they are targeting STEM. We are working on a list of back files and e-books targeting five million.
- Putting together a data boot camp proposal to be held at UF including faculty from all over. The purpose is to get a handle on how data is being used at UF. When submitting grant proposals to the NSF (National Science Foundation), you need to have a data management plan with it. If other foundations start asking for the same information, the Science & Technology Librarians need to educate themselves for when others ask for help.

<u>Storage</u>- It did pass. They want to know how much it would cost for people to participate. After that will be getting signatures. It will be open to independents in Florida.

<u>OLE Update</u> – The OLE (Open Library Environment) presentation will travel around to the sub-committees and CSUL per the recommendation of the CSUL committee. There is an OLE presentation and then a question and answer period.
Maureen will work on the OLE project. She will go with Rachel to Chicago to meet with an OLE council and then go to a RICE programming training for the OLE program.

<u>E-Books </u>– Creating different models for purchasing e-books.

One idea is a patron driven model; although, there is a lot of technical difficulty with it.

Approval Update – It will be late September to early October before we hear anything.

Diane will be going up to Coutts next week for some meetings. She will find out more about the Coutts implementation.

X   **Wrap up/Agenda Topics for Next Meeting**

AGRSSR

Diane wants to take another look at AGRSSR. The main topic at the next meeting is:
- What should AGRSSR do?
- What should AGRSSR be?
- What are we going to call it? Diane wants to change the name.
- Redefine the goals of the meeting. Diane has some ideas.
- Discuss liaison librarians. What it means; how it will be defined; and how people can become liaison librarians.
- Have some ideas for the next meeting.
