Technical Guidelines for Digitizing Text

TEXT DIGITIZATION

- Resolution:
 - 300 dpi *minimum*
 - Small type-face: 600 dpi, *optimally*
 - Scan at either 300 or 600 dpi, no other setting
This project is optimized for Prime Recognition software, which prefers these settings. Other settings may decrease accuracy of text conversion.
- Bit-depth & Color-space:
 - Text without illustration: bi-tonal (black & white)
 - Text with grey illustration: 8-bit grey scale
 - Text with color illustration: 24-bit sRGB
- Format:
 - Archive format: TIFF, uncompressed
 - Delivery/Use format: do not create
Delivery formats will be generated from TIFF's by Prime Recognition software at the University of Florida.
