

Francisco Sugar Company.

Maps, charts and plans, ca. 1915-1959.

17 boxes.

Series 83 contains a file of maps, charts and plans maintained by the New York office of the Francisco Sugar Company. Part of the file was indexed; other items were simply labeled. The last portion of the file contains copies of maps registered with the Instituto Nacional de Reforma Agraria in 1959. Most of the materials are copies of originals, although a few, rough, hand drawn maps are present. In many cases, the copies are overlaid with hand drawn additions and alterations.

Many of the maps reproduced for this file were created between 1910 and 1930. However, the copies in this series were, for the most part, generated in the 1950s.

The maps document the property boundaries of the *colonias*, pasture lands, the *bateys* of the Central Elia and Central Francisco, water wells, and railroad lines of the Francisco Sugar Company. The series also contains building plans for dwellings, warehouses and a school. Charts documenting fertilizer use and steam needs are also included. Accompanying documents are sometimes attached to the maps and plans. Other accompanying documents are stored in the first box.

Two of the indexed files were not found.

With the exception of the INRA maps and the accompanying documents in Box 1, all items in the series are stored according to size. The dimensions of each item are provided in the inventory. The contents list begins with a box list stating the dimensions of the items in each box. An inventory of the items follows. The inventory begins with the indexed items followed by the labeled materials. The last three boxes contain the INRA maps.

Contents listBox list
